Activity 01 - Stakeholder Brief and Colour-Safe Workspace

Course: Adobe Lightroom Masterclass Course Code: C200 Alignment: Topic 1
Version: v1.0 | 30 September 2026

Scenario

BrightFrame Studio has been hired by a Singapore wellness brand to prepare a calm, premium hero photograph for a mobile campaign. The brand manager wants natural skin and product colour; the photographer wants a warmer editorial mood; the campaign lead needs a 4:5 crop by 4 pm. The studio monitor has not been checked recently and mixed office lighting affects colour judgement.

Role cards

Role 1: Photo editor

Represent this stakeholder's legitimate needs, constraints, quality risks, and preferred outcome. Record decisions in observable production terms.

Role 2: Brand manager

Represent this stakeholder's legitimate needs, constraints, quality risks, and preferred outcome. Record decisions in observable production terms.

Role 3: Photographer

Represent this stakeholder's legitimate needs, constraints, quality risks, and preferred outcome. Record decisions in observable production terms.

Role 4: Campaign lead

Represent this stakeholder's legitimate needs, constraints, quality risks, and preferred outcome. Record decisions in observable production terms.

Role 5: Quality observer

Represent this stakeholder's legitimate needs, constraints, quality risks, and preferred outcome. Record decisions in observable production terms.

Scenario questions

1. Which requirements are mandatory and which are preferences?
2. What workspace risk could cause an incorrect colour decision?
3. Why is your chosen Lightroom variant suitable?
4. What evidence shows stakeholder consultation changed the edit direction?
